

Danielle Purkiss - Research Associate

Danielle is an Architect interested in material culture, technology and circular economy design. She is a Research Associate on our UKRI Circular Metals and UKRI Compostable Plastics projects where she leads Citizen Science and material systems design research. Prior to this Danielle was a Research Associate on our previous UKRI Plastics Research and Innovation Fund project - Designing out Plastic Waste. She completed her architecture training at UCL Bartlett School of Architecture and London Metropolitan University and has since created several award-winning designs across housing, workspace and education sectors. She teaches about circular economy design in the UK and internationally.
